

PARALLEL GEOSCIENCE

Engineering
Tools for building
The Future

Wind farms, airports, bridges, tunnels, nuclear safety, metro systems, dams, mines, roads, railroads, buildings – these are just a few examples of the projects where SPW has been successfully used for more than thirty years. We look forward to helping build the infrastructure needed for the next 30 years.

PARALLEL GEOSCIENCE

The SPW Engineering package provides the complete SPW system at a fraction of the cost. SPW is optimized for quickly processing either land or marine seismic surveys including real time ultra high resolution marine. Contact us to join the growing number of satisfied customers using SPW for infrastructure and safety analysis projects.
